

Brigade S-1 Operations Course

Senior Leader Training Division
Adjutant General School

Overview of Enlisted Distribution and Assignment System (EDAS)

June 2015

Terminal Learning Objective

ACTION: Demonstrate the Enlisted Distribution and Assignment System (EDAS)

CONDITIONS: Given the EDAS Field User Manual, student password, and access to the training database and an awareness of Operational Environment (OE), variables and actors.

STANDARD: The students will meet the standard of 70% accuracy when they:

1. Define EDAS Capabilities
2. Verify installation of the EDAS software
3. Access PERnet/EDAS training database
4. Demonstrate EDAS function keys and screens - Part I
5. Demonstrate EDAS function keys and screens -

Outline

- Define EDAS Capabilities
- Verify installation of the EDAS software on a computer
- Access PERnet/EDAS training database (live system techniques)
- Demonstrate EDAS function keys and screens, Part I and II

EDAS Purpose and Functions

- EDAS is a real time, interactive automated system used to distribute and assign the enlisted force
- Issues assignment instructions via automated data transmission (ADTRANS) that arrives in the field as eMILPO output
- Provides EPMD and field users authorizations and assigned/projected strengths by MOS, Grade, SQL, ASI, and Language
- Provides enlisted strength management information to field commands
- Provides interactive update capability to post information directly to the TAPDB for authorized users, including field users, to delete or defer

PERnet Access

PERnet System Access Registration- HRC User Registration System (HURS) or TAPC Form 49-R

- Submit request for access to the unit HRC User Registration System (HURS) Manager
- The HURS Manager may require a TAPC FORM 49-R.

HURS -

- Located on the HRC Active Homepage
- grants access to functions to field users based on different levels

Check on Learning

Q: What is the purpose of EDAS?

To provide an automated system to distribute and assign the enlisted force of the Army

Q: What are some of the functions of EDAS?

- Issues assignment instructions via automated transmission to eMILPO
- Provides EPMD and field users with authorization and assigned and projected strength data
- Provides enlisted strength management information to field commands
- Provides interactive update capability

QWS3270 Secure

PERnet Logon Screen

(1 of 3)

Attention

YOU ARE ACCESSING A U.S. GOVERNMENT (USG) INFORMATION SYSTEM (IS) THAT IS PROVIDED FOR USG-AUTHORIZED USE ONLY

By using this IS (which includes any device attached to this IS), you consent to the following conditions:

- The USG routinely intercepts and monitors communications on this IS for purposes including, but not limited to, penetration testing, COMSEC monitoring, network operations and defense, personnel misconduct (PM), law enforcement (LE), and counterintelligence (CI) investigations.
- At any time, the USG may inspect and seize data stores on this IS.
- Communications using, or data stored on, this IS are not private, are subject to routine monitoring, interception, and search, and may be disclosed or used for any USG authorized purpose.
- This IS includes security measures (e.g., authentication and access controls) to protect USG interests-not for your personal benefit or privacy.
- Notwithstanding the above, using this IS does not constitute consent to PM, LE, or CI investigative searching or monitoring of the content of privileged communications, or work product, related to personal representation or services by attorneys, psychotherapists, or clergy, and their assistants. Such communications and work product are private and confidential. See User Agreement for details.

Enter YES to accept or NO to decline

Type in "yes" and press
"Enter"

PERnet Logon Screen

(2 of 3)

- The PERnet logon screen will appear.
- PERnet IP address must be correct.
- Must obtain a PERnet and EDAS Logon user account
- Logon using the AL number provided by the unit HURS manager. For first time users, the PERnet password has been changed to be the same as the PERnet ID with a "\$" as the eighth character. The system will state that the password has expired and request that a new password be created. The password must meet the password standards. CREATE PASSWORD.

The system will now prompt you to create a new password according to the password standards on the next slide.

Password Standards

- ✓ All passwords must be 8-12 characters in length
- ✓ May not have repeating characters
- ✓ May not have vowels
- ✓ Is case sensitive and must have at least 2 alpha characters, 2 numeric characters, and 2 special characters of your choice, as long as they follow these rules (Note: In the field the ! and @ characters can't be next to each other nor can # and \$ or % and ^ etc, etc.)
- ✓ All passwords are valid for a maximum of 90 days
- ✓ A history of 4 passwords will be kept

ATTENTION!

This is a DOD computer system. Before processing classified information, check the security accreditation level of this system. Do not process, store, or transmit information classified above the accreditation level of this system. This computer system, including all related equipment, networks, and network devices (includes internet access) are provided only for authorized U. S. Government use. DOD computer systems may be monitored for all lawful purposes, including to ensure their use is authorized, for management of the system, to facilitate protection against unauthorized access, and to verify security procedures, survivability, and operational security. Monitoring includes, but is not limited to, active attacks by authorized DOD entities to test or verify the security of this system. During monitoring, information may be examined, recorded, copied, and used for authorized purposes. All information, including personal information, placed on or sent over this system may be monitored. Use of this DOD computer system, authorized or unauthorized, constitutes consent to monitoring. Unauthorized use of this DOD computer system may subject you to criminal prosecution. Evidence of unauthorized use collected during monitoring may be used for administrative, criminal, or other adverse action. Use of this system constitutes consent to monitoring for all lawful purposes.

PERNET

QWS3270 Edit View Options Tools Help

ATTENTION ALL PERNET USERS

QWS3270 Secure is available for download and installation. All PERnet users are now required to access the system using this new software. Previous editions of QWS3270 will not function with the new requirement for using secure telnet protocol. You will need to make sure that your network or firewall administrator opens port 9943 on your network to support Secure Telnet to the PERnet system.

QWS3270 Secure may be downloaded and installed from the <https://www.hrc.army.mil> website by clicking MY RECORD PORTAL, entering your ARO userid and password, and selecting PERNET/AORS under Self Service Applications. You will need to follow the directions completely to establish your Secure connection to PERnet.

IF you encounter difficulties with the installation, please contact the Human Resources Command Central Call Center at COM: 703-325-0303 or D3W: 221-0303. NOTE: IF you are located within the Hoffman I & II complex or you telnet directly to the Pentagon mainframe systems, then the QWS3270 Secure client is most likely already loaded on your PC. In this case, you will only need to print the configuration instructions to establish your Secure connection to PERnet.

Summary

- EDAS is a real time, interactive automated system used to distribute and assign the enlisted force
- Issues assignment instructions via automated data transmission (ADTRANS) that arrives in the field as eMILPO output
- Provides EPMD and field users authorizations and assigned/projected strengths by MOS, Grade, SQI, ASI, and Language
- Provides enlisted strength management information to field commands
- Provides interactive update capability to post information directly to the TAPDB for authorized users, including field users, to delete or defer Soldiers

Terminal Learning Objective

ACTION: Demonstrate the Enlisted Distribution and Assignment System (EDAS)

CONDITIONS: Given the EDAS Field User Manual, student password, and access to the training database and an awareness of Operational Environment (OE), variables and actors.

STANDARD: The students will meet the standard of 70% accuracy when they:

1. Define EDAS Capabilities
2. Verify installation of the EDAS software
3. Access PERnet/EDAS training database
4. Demonstrate EDAS function keys and screens - Part I
5. Demonstrate EDAS function keys and screens -
